

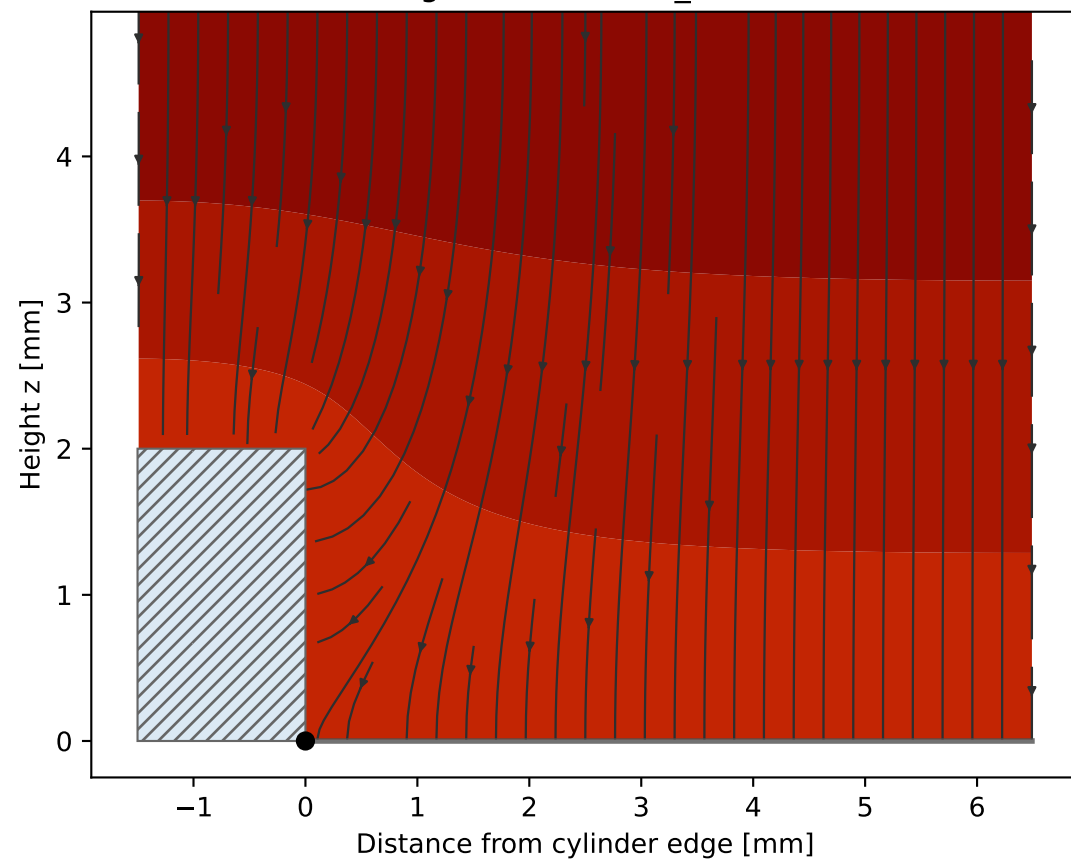

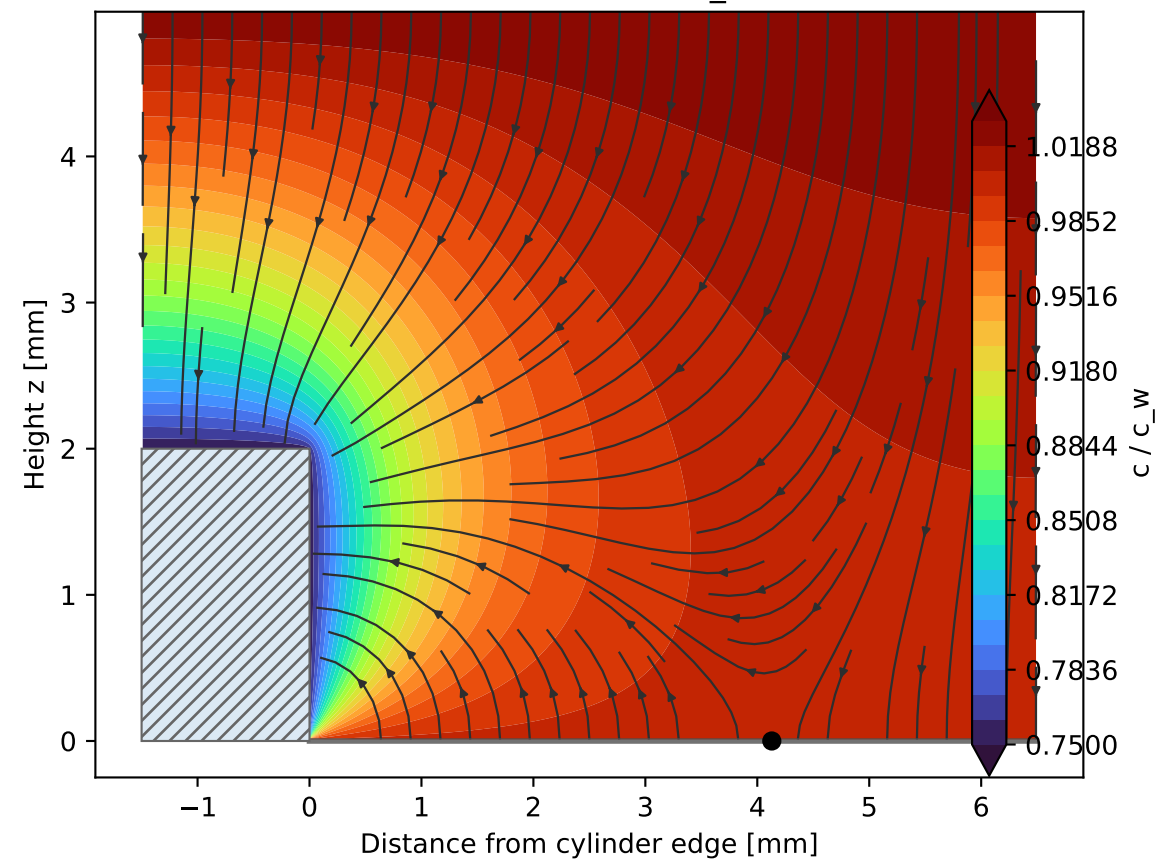

Figure 1: Cylindrical source simulation (side and top views)

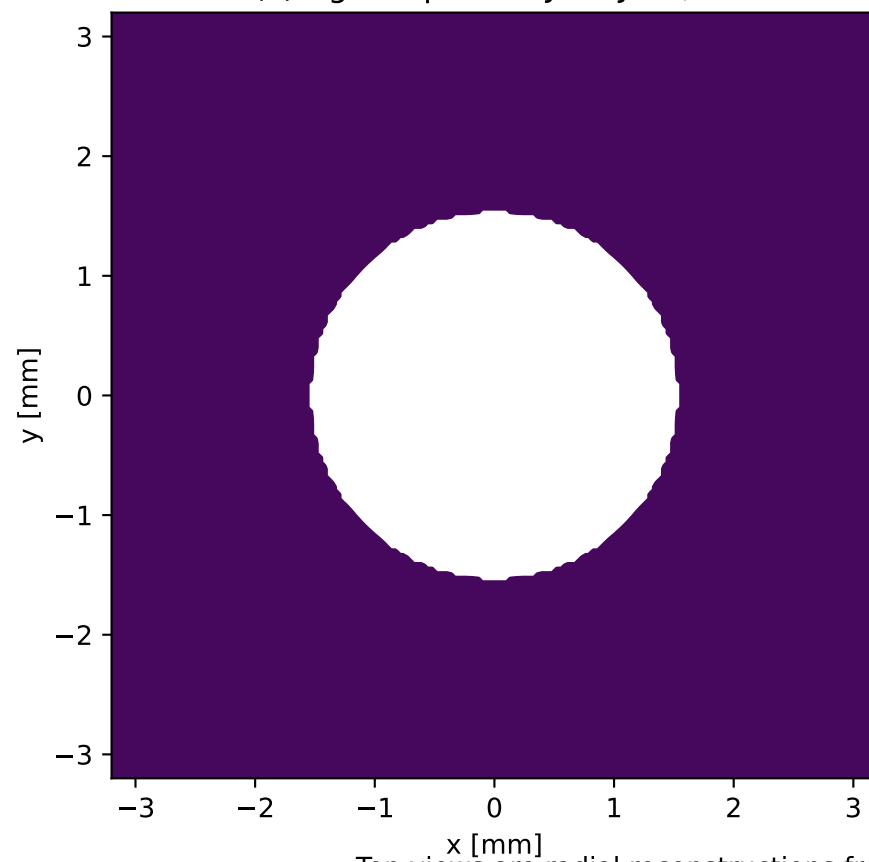

(a) Agar side view ($a_w=1.00$)

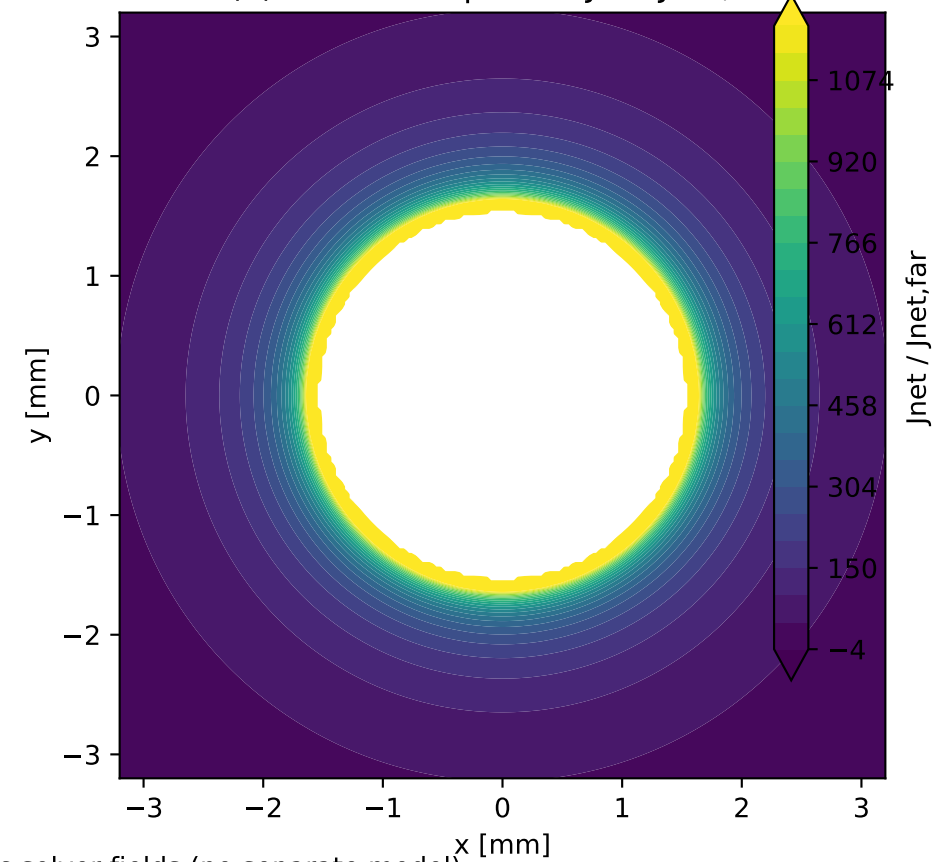

(b) 2:1 NaCl side view ($a_w=0.75$)

(c) Agar top view: $J_{net}/J_{net,far}$

(d) 2:1 NaCl top view: $J_{net}/J_{net,far}$

Top views are radial reconstructions from the same axisymmetric solver fields (no separate model).
